
Agreement for IT Development Project

This agreement is made between:

- **Developer:** Enzo Höhenberger, part of team Locotion
- **Client:** Nathanael R, Homeowner

Project Description: The Developer agrees to create a simple software solution for managing household bills, expenses, and documents for the Client. This software will include:

1. **Bill Tracking:** Tracking due dates and amounts for utility bills, insurance, and taxes.
2. **Document Storage:** Storing receipts, invoices, and important home-related documents.
3. **Reminder System:** Notifications for upcoming bills or maintenance tasks.

Timeline: The project will be completed within **20-30 hours** of development work, with progress updates and feedback sessions with the Client with internal discussion between team members. The estimated timeline for completion is 28 hours.

Client's Responsibilities:

- Provide necessary information about the types of bills and documents to be tracked.
- Provide feedback during the development process to ensure the final product meets the Client's needs.
-

Developer's Responsibilities:

- Develop the software solution according to the agreed-upon features.
- Provide ongoing support and adjustments based on Client feedback during the project.

Proof of Agreement: By signing below, both parties acknowledge their agreement to the above terms. This agreement will serve as proof of the Client's participation in the project.
